OFFICE BUILDING BY ASAA

ASAA obtained the approval of the construction rights* for the WTC offices building (22.000m²). This 7 floor building is located on the edge of the further Airapolis-World Trade Center next to the Airport Paris-Charles De Gaulle.

The H shape building with its cantilever seems to be like a monolithic dynamic structure overhanging the complex. Close to the plane hangars, grand like the new A380 airplane, this office building is emblematic of the Airapolis-World Trade Center and gives the opportunity to the users to overlook the site.

The office building is organised around the bright hall entrance which is distributing the access to the two offices part composed by open space, car park, Inter Company Restaurant etc.

Moreover, matching the HQE Norm (High Environmental Quality), this offices building will include specific installations as solar panels, geothermic heating and cooling system, low energy lighting or a vegetal roof to create a natural retention for raining water and better isolation. Like this, the offices building of Airapolis-WTC will offer high quality working condition respecting the Environment.

THE STUDIO:

Created in Paris by Axel Schoenert in 1999, Axel Schoenert Architectes Associés (ASAA) agency is developing its competencies in all the domains that architecture is offering: meaning that ASAA is working on architectural projects, interior design, project management, quantity surveying, and building analysis services for clients in both public and private sectors.

Since the agency has been created, ASAA realised some projects in France and abroad thanks to the international team. The international team represents ASAA's strength since ASAA is a multilingual and multicultural team with various backgrounds which help to broaden our vision.
